Projects

- **Afrigomall**
  An E-commerce website with 9 different crypto coins with respective tokens & 3 wallet connection management. In which, the user can either be a seller or a buyer.
  They can Sell & buy products with their crypto currencies.
- **Ludo King**
  A player can bet their wallet amount to play their role. Once the match is completed the winner receive the winning amount apart from admin fee. In case of tournament matches, the number of winners & winning percentage will be determined by admin.
- **Dexa NFT**
  A user can create, buy, sell & bid their NFT's. Each NFT has an unique signer address to track their activities on blockchain, which is Dexa network. The coin initiated on it to buy & bidding purpose is BFIC and their respective token WBFIC (ETH - Erc20).
- **Binasea NFT**
  Admin will create an NFT signer hash on particular collection and a user can Buy & Sell their owned NFT's bought from Admin. The NFT transactions are tracked using phantom & solflaire wallet, each time the NFT is being configured it's Market increases gradually on the contract.
- **Livescores**
  It's a sports score updation project, which we use third party known as rapid API for an instant update of a result. Here we integrated 9 different games which involves live score, summary, news, odd values etc..,
- **BOWO Defi**
  A De-centralized project which a user can swap their USDT to own token an perform staking, proposal & create Bond. They'll receive a reward token depends on their investment & tokans.

- **BOWO Neo-banking**

  Where the user can convert their own token into USD which they rewarded in BOWO Defi and they can even perform smart transaction through Money gram payment gateway.
- **Rico jogos**

  Participated in 3 games that are Keno, candycrush & Memory Gem.

  A multiple online gameing website, a user have to bet their wallet amount to play. They can enroll on any game that are listed on the website, their rewards will be offered depends on their risk levels and the level of points where defined by admin.
- **GreenHeart**

  User can enroll as Manufacturers or farmers.
  The manufacturers are sellers, they'll sell their products on the market place. If admin gives authorization to their products, it'll be displayed depends on category & collections.
  If an user is a farmer they can create, buy, sell & bid their NFT's and they can even buy products through crypto currencies.

Personal skills

Ability to build relationship and setup trust.
